Attachments: 2019 EPA Annual Report Part 2 rev.pdf; 2019 Annual Report for Land Application in CA.pdf; Use and disposal 2019.xlsx

Hi Matias,

Attached is Denali's 2019 report for its northern California POTWs (the biosolids were all applied in Merced County), Synagro's report (they land apply at several Central Valley sites and a small amount at sites in Solano County within RB2), and use and disposal practices for major POTWs (for Bay Area facilities, do a filter for Bay Area counties, i.e. Santa Clara, San Mateo, San Francisco, Alameda, Contra Costa, Marin, western Solano. Let me know if you have any questions on the use and disposal file.

Lauren

Hi Lauren,

Thank you so much for taking the time to send me this information! I appreciate it! Yes, when you have time, could you send me the spreadsheet mentioned, and the reports from Denali and Synagro? Once again, I appreciate your help!

Have a great afternoon/evening!

Cheers,

Matias

Subject: Biosolids reports

EXTERNAL:

Hi Matias,

Here are the biosolids 2019 reports for San Francisco (Southeast and Oceanside plants), San Leandro, Central Marin, and Livermore. I also included the report from Lystek, which further treats some of San Francisco and Central Marin's biosolids to Class A and land applies it in Solano County (not sure whether any of their sites are within RB2).

Let me know if you would like a spreadsheet showing use and disposal practices for all RB2 major POTWs in 2019 (this does not include all data on counties where these POTWs' biosolids are used or disposed, as EPA's current electronic database does not include fields for reporting this). I also have land application reports from Synagro and Denali, two of the companies that land apply biosolids from many RB2 treatment plants (most of their sites are within the Central Valley).

Lauren
